

LMP 140

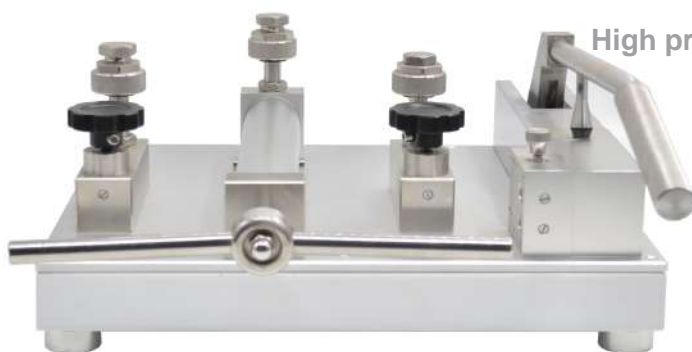

Pneumatic pressure test pump LMP 140 is a hand pump operated and designed to generate pressure range -950 mbar ... 100 /140 bar. 0,1 mbar pressure resolution. Build-in filters to protect from dirt and moisture to reduce the need for maintenance. Two hand-tight quick connectors installed on the pump, allows easy connecting and disconnecting to the test pump no need for PTFE tape or wrenches.

APPLICATIONS

Calibrations and verifications on-site
Pressure generator -0,950 bar ... **100 / 140 Bar**
Suitable for all types of pressure equipment

HIGHLIGHTS

Easy of use
Compact, lightweight
High pressure thanks to a pressure wheel
High precision thanks to the fine adjustment valve
High resolution 0.1 mbar
Hand-tight quick connectors

INCLUDES:

- Output connection 3 x M20x1.5 female
- Pneumatic hand pump pressure generator
- Pressure relieve valve
- Fine adjustment valve
- Relieve and reverse valves

Technical data

Pressure range	-0.95 ... 100 / 140 bar
Medium	Air
Process connection	3 x M20 x 1.5 Female
Fine adjustment of pressure	Fine adjustment valve resolution 0,1 mbar
Overpressure connection	Adjustable via locknut
Material	Stainless steel, aluminum Seals: Buna-N
Dimensions	380L X 380W X 200H (mm)
Weight	14.8 kg

INCLUDED IN THE SUPPLY

Test pump LMP 140

Pneumatic handpump pressure generator

Reference manometer adapter NPT 1/4" (female)

OPTIONAL

Service kit for hand pump test LMP 140 with several O-rings and seals

Precision digital pressure gauge IKA 200 / IKA 300

Set of adapters 10 pcs.
